- 10) When the function is completed, the appliance beeps.

7.MAINTENANCE

—◦ Cleaning

The accessories may be washed with a sponge in soapy water. Use a damp cloth to clean the base unit.

—◦ Note :

- Clean the appliance after each use.
- Always unplug the appliance and wait for it to cool before cleaning.
- Never immerse the motor unit in water.
- Do not use abrasive products. Never pour bleach or chemical sterilizing solutions/tablets into the appliance.
- Do not use steel wool, abrasive cleaning agents or aggressive liquids (such as gasoline, acetone or alcohol) to clean this product.

—◦ Descaling

- 1) Pour 40ml of water and 30ml of water vinegar (6–8% acetic acid) into the heating plate.
- 2) Leave the solution in the heating plate until the limestone has resolved. The process Take about 20 minutes.
(When descaling, do not put the plug in the wall socket).
- 3) Empty the heating plate, thoroughly rinse it and wipe it with a soft cloth.

—◦ How to remove water spots and lime scale

When you use the warmer and sterilizer, small spots may appear on the heating plate in the base . This is lime scale that is building up. The harder the water; the faster limestone builds up. Descale the warmer and sterilizer once a week to ensure that it continues to work effectively. The frequency of descaling depends on how much limestone is building up.

—◦ Storage

- 1) Before you store the appliance should be emptied host of water.
- 2) Before storing the product, ensure that all parts are clean and dry.(see "Cleaning" chapter)
- 3) Do not use the machine long in the sun, prolonged sun exposure, in order to avoid yellowing Material accelerated aging.
